

No child should feel unsafe at school. No mother should have to explain to her children what kind of monstrosity took place in Florida, or in any particular mass shooting. Seventeen lives were taken, and we stand here and honor them today. We want safety in our schools, and it starts with us (the students). We must demand action, because we are future of this country and its fate lies with us. It angers me that the shooter in Parkland, Florida was able to buy a semi-automatic firearm after being tagged on the FBI's watch list, and had a reported 35+ police calls to his house in a duration of 9 years. We demand action from our system when it is called for. Our system has failed us.

I love our school and enough is enough
Thank you
